

### ***Combining confidence and knowledge to increase sales, members and safety***

Trusted by the US military, Fortior Solutions is a leading provider of identity proofing and vetting technology that helps organizations build networks of trusted individuals. Although there are a wide variety of dating platforms, those that provide either a base level or premium level for long-term relationships require trust that only thorough vetting from a trusted supplier can provide. Ensuring the integrity of individual members' profile claims is paramount to providing that trust. It is essential to the long-term success of online dating companies that provide a level of service where trust is extremely important to vulnerable members. However, most online dating companies rely upon unverified or at best "lightly" verified information that is self-submitted by individuals.

We know that your industry is highly competitive. Your organization can strengthen its market position by taking more proactive steps to ensure its platform contains accurate and *verified* profile information – **and increase its revenues at the same time.**

Together, we can bolster the integrity of individual members' profile claims by developing a new Membership Level that would allow individuals to select verification criteria and opt-in to having the information validated to create trust among other members. This new feature would foster confidence, trust and reliability of individual members' profile information. Below are just a few examples of profile information that could be verified:

- ✓ Identity (including aliases)
- ✓ Highest level of education
- ✓ Criminal history (e.g., felony convictions, open warrants, registered sex offenders)
- ✓ Employment status
- ✓ Bankruptcy history and/or income
- ✓ Military Status (Active duty or retiree)
- ✓ Marriage/divorce history

#### **Example:**

**Verified Information**

- ✓ Identity
- ✓ Criminal records
- ✓ Education
- ✓ Marriage/Divorce

**Online now!**

31 year old woman  
Portland, Oregon

**With Fortior Solutions' help your members won't need to ask:**

Is this someone I feel safe being alone with?

Is this someone I can trust?

Is this person responsible?

Is this someone I want to introduce to my family

By teaming with Fortior Solutions, you can further expand your market, increase your network's integrity, offer additional benefits to your members, and take advantage of additional revenue share opportunities. Our company's 15 years of experience with the U.S. military uniquely qualifies us to provide the most comprehensive and trusted identity proofing and vetting solution for online dating applications and your members. We are committed to providing secure, streamlined and effective vetting and verification solutions.

Your company stands out above other online dating networks in no small part because of your commitment to innovation, collaboration and trust. Our company looks forward to the opportunity to partner with you to strengthen trust in individual members through our comprehensive, user-friendly technology.

#### **ABOUT US:**

Fortior Solutions is the leading provider of identity, vetting, credentialing and access control solutions; helping organizations reduce risk by quickly identifying who they can trust. Our proven vetting solutions and expertise give organizations like yours the tools, resources and options to create safer and more secure environments for your clients.
