

When issuing a credential, it is important to carefully review the participant's name as it appears on the RAPIDGate Premier™ credential versus the name as it appears on the participant's identification documents.

1. Review the two forms of identification provided by the participant.

2. If any parts of the two forms of identification are not sufficient matches, ask the participant to provide two forms of ID that do provide a sufficient match.

3. If both forms of identification match, check the RAPIDGate Premier credential against the participant's identification.
